Skills

- C++
- JavaScript
- PHP
- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- React Native
- Redux
- Tailwind CSS
- Responsive Design
- Node.js
- Express.js
- REST APIs
- Authentication & Authorization
- Session Management
- MongoDB
- MySQL
- MongoDB Atlas
- Git
- GitHub
- Render
- VS Code
- Postman
- NPM
- API Integration
- Debugging
- Agile Development
- Problem Solving

Education

Experience

Final Year Undergraduate

Software Engineering | Delhi, India | 2024

- Designed and developed multiple full-stack web applications using modern JavaScript technologies, implementing responsive user interfaces and dynamic functionality
- Implemented RESTful APIs and backend services using Node.js and Express.js, creating scalable server-side applications with efficient data handling
- Built responsive user interfaces using HTML, CSS, and JavaScript frameworks, ensuring cross-browser compatibility and mobile-first design principles
- Integrated MongoDB databases for efficient data storage and management, designing optimized database schemas and implementing CRUD operations
- Followed Agile development practices including version control using Git and GitHub, collaborating with team members through code reviews and feature branching
- Debugged and optimized application performance for better user experience, identifying bottlenecks and implementing performance improvements
- Collaborated with peers to design scalable and maintainable application architectures, participating in technical discussions and solution design

Projects

Stay Nest — Travel Booking Web App

Node.js, Express.js, MongoDB — 2024

- Developed a full-stack travel booking platform allowing users to browse and book travel listings, implementing user-friendly search and filtering functionality
- Implemented secure user authentication and authorization using session-based login, protecting user data and ensuring secure access to application features
- Designed RESTful APIs for managing listings, reviews, and user data, creating a robust backend infrastructure for the travel booking platform
- Integrated MongoDB Atlas for scalable cloud database management, ensuring high availability and data redundancy

for the application

- Built dynamic server-side rendered pages using EJS templates and Bootstrap, creating a responsive and visually appealing user interface
- Implemented CRUD operations for travel listings and user reviews, enabling complete data management functionality for the platform
- Deployed the application on Render for public access, configuring production environment and ensuring smooth deployment process

Stone Paper Scissors Game

HTML, CSS, JavaScript — 2024

- Developed an interactive browser-based game using vanilla JavaScript, implementing game logic and user interaction features
- Implemented game logic for player vs computer gameplay, creating a challenging and engaging gaming experience
- Designed responsive UI with animations and score tracking, providing visual feedback and enhancing user engagement
- Handled DOM manipulation and event handling for smooth gameplay, ensuring responsive and intuitive user interactions
- Improved user engagement through dynamic feedback and visual effects, creating an enjoyable gaming experience

To-Do List Application

HTML, CSS, JavaScript — 2024

- Built a task management application allowing users to add, delete, and complete tasks, providing essential productivity features
- Implemented local storage to save tasks persistently in the browser, ensuring data availability across sessions
- Designed responsive UI using modern CSS layout techniques, creating a clean and intuitive user interface
- Added real-time task updates and dynamic DOM rendering, providing immediate feedback to user actions
- Deployed the project using GitHub Pages, making the application accessible online
